

ABSTRACT

The present invention relates to:

- cosmetic compositions comprising, as an active ingredient, at least one substance which promotes the intercellular communication of skin cells, particularly keratinocytes, fibroblasts and skin preadipocytes;
- the use of at least one substance which promotes the intercellular communication of keratinocytes, fibroblasts and skin preadipocytes as a cosmetic agent, optionally in the presence of a cosmetically acceptable vehicle; and
- a method of promoting and/or increasing the activity of a cosmetic agent acting directly in the cell or via intracellular second messengers, and a method of cosmetic skin anti-ageing treatment.
